

% of each resource's benefit captured by 10% of tokens

best tokens for long context	56	18	13
best tokens for extra depth	22	36	12
best tokens for the 6.9B model	12	15	40
highest entropy (windowed pass)	25	15	21
highest entropy (full context)	13	12	23
random tokens	10	10	10
	long context (window → 1k)	extra depth (layer 12 → 24)	bigger model (1.4B → 6.9B)
